No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Description

Sequence 4, Application US/11028922A

Publication No. US20050271639A1

GENERAL INFORMATION:

APPLICANT: Penn, Marc

TITLE OF INVENTION: GENETICALLY ENGINEERED FOR THERAPEUTIC APPLICATIONS
FILE REFERENCE: CF-7019

CURRENT APPLICATION NUMBER: US/11/028,922A

CURRENT PILING DATE: 2005-01-04

NUMBER OF SEQ ID NOS: 9

SOFTWARE: Patentin version 3.3

SEQ ID NO 4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       6 ValSerIleTyrThrSerAspAsnTyrSerGluGluValGlySerGlyAspTyrAspSer
